### Professional Experience

- Python -Django Full Stack Developer,** Luminar Technolab  
May 2024 – present | Kochi, Kerala
- 1. Digital Artistry Hub-E-commerce Platform for Artworks**
  - Constructed a robust full-stack web platform utilizing Django alongside the REST framework, facilitating seamless API integrations which improved data retrieval speeds for user transactions by an average of 30 seconds.
  - Developed a Django-powered e-commerce platform, Digital Artistry Hub, connecting over 1,000 artists with customers; enabled the seamless buying and selling of digital artworks while enhancing user engagement through smart features.
  - It features a secure payment gateway integration using Razorpay, user authentication, profile management, and interactive notifications for new releases and discounts.
  - Implemented **Twilio** API for real-time SMS notifications, sending alerts for new artwork releases, discounts, and order updates to customers.

**Software Developer Trainee,** Geesesquads LLP  
November 2023 – May 2024 | Kochi, Kerala

- Developed and optimized** responsive and high-performance front-end components for diverse web applications, improving user interface speed and overall responsiveness.
- Collaborated with cross-functional teams** to design and implement new features, ensuring smooth integration with back-end services and delivering cohesive functionality.
- Participated in code reviews** to uphold code quality standards, enhance maintainability, and promote adherence to best practices within the development team.
- Troubleshoot and resolved** complex issues in existing codebases, ensuring reliable functionality and a seamless user experience.

### Technical Skills

- Frontend Development:** HTML5, CSS3, Tailwind CSS, Bootstrap5, JavaScript, React.js, Figma
- Backend Development:** Python, Django, Rest APIs
- Database Management:** MySQL, SQLite
- Version Control & Collaboration:** Git, GitHub

### Academic Projects

- Kids Learning Website for Ages Under Six**
  - Constructed a backend framework leveraging Python and SQLite, optimizing data management and enhancing application reliability.
  - Created a dynamic learning platform tailored for children under six years old.
  - Implemented interactive features such as rhymes and stories to engage young users.
  - Utilized Python for backend development and SQLite for efficient data management.
  - Designed to provide a safe and educational experience with age-appropriate content.
